

SUBJECT INDEX VOLUME 2

Acridones	64	Apoptosis	1
chemistry of	64	apoptogenic factors in	5
effect of derivatives on cellular accumulation/ efflux of [³ H]VLB	65	BAD pathway in	2
in drug-sensitive/resistant cancer cell lines	69	BAP 31 in	6
<i>in vitro</i> cytotoxicity of	69	Bcl-2 family in	6,8
lipophilicity effects of	65	BI-1 in	7
pharmacological activity of	65	c-Abl in	8
Akt-dependent cross-talk	2	caspases in	3
Aldose reductase inhibitors	39	c-Jun N-terminal kinase JNK in	3
chemistry of	41	cytochrome in	4
thienocinnolinone alkanolic acid derivatives as	39	endo G in	5
Alkylating steroidal esters	569	hexokinases in	3
<i>in vitro</i> evaluation of	569	IP3R in	5
rational design of	569	NF- κ B in	5
synthesis of	569	NF- κ B/I κ B in	5,9
All- <i>trans</i> -retinoic acid	457	non-kinase-dependent pathways in	3
alkaline phosphatase activity in pancreatic cancer cells	457	p53 family proteins in	4,9
effect on cell cycle	457	PACS-2 in	7
flow cytometric analysis of	457	protein kinase C in	3
MTT assay of	457	therapeutic targets for	7
2-Amino-1,4-benzoquinones	591	Apoptosis inducing factor (AIF)	5
anti-neoplastic effects of	591	Apoptosis signal-regulating kinase 1 (ASK 1)	3
inhibition of human 5-lipoxygenase by	591	2'-Arabinofluoro-2'-deoxyuridine analogues	287
5-(4-Aminophenyl)-4-substituted-2,4-dihydro-3h-1,2,4- triazole-3-thione derivatives	415	biological studies of	287
antituberculosis activity relationships study of	415	chemistry of	288
electronic-topological/neural networks approach to	415	<i>in vitro</i> anti-mycobacterial activities of	287
structure of	415	synthesis of	287
4-Androstene-3,17-dione/adenosine hybrid compounds	329	2'-Arabinouridine	287
as bisubstrate inhibitors of type 317 β - hydroxysteroid dehydrogenase	329	biological studies of	287
chemical synthesis of	331	chemistry of	288
design of	329	<i>in vitro</i> anti-mycobacterial activities of	287
<i>in vitro</i> evaluation of	329	synthesis of	287
inhibition of	334	Arterial proliferative diseases	13
synthesis of	329	antisense treatment for	14
Anticancer activity	597	mechanisms of	13
of 5-benzylidene-2-phenylimino-1,3-thiazolidin- 4-one (BPT) analogs	597	ribozyme treatments for	15
Anticancer drugs	113	Aryl-acetic	251
in multi-drug resistant cell lines	113	anti-inflammatory activity of	251
Anticonvulsant arylsemicarbazones	55	as antioxidant	251
chemistry of	55	as novel lipoxygenase inhibitors	251
pharmacological activity of	55	chemistry of	252
structure-activity relationship of	55,60	physicochemical studies of	254
synthesis of	55	synthetic methodology for	252
Antisense	14	ATP/non-ATP dependent inhibitors	213
modification of	14	development of	213
principle of	14	docking domains on	218
		inhibition based on disrupting protein-protein interactions	218
		Benzophenones	377
		cytoprotective effects of	377
		from <i>Hypericum annulatum</i> in models of epirubicin-induced cytotoxicity	377
		mechanistic investigations on	377
		SAR-analysis of	377

2-Benzyl-1,1-diarylbut-2-ones	147	Carbamates side-chains	21
antiestrogenically active type	147	hydrogenolysis of	21
as estrogen receptor antagonist	147	in 1 β -carbapenem OCA-983 in biphasic media	21
biochemistry of	153	Cardiovascular diseases	13
chemistry of	148	development of gene therapies for	13
computational studies of	158	nucleic acid medicines in	13
cytotoxicity profile of	154	pyrrole imidazole poly amides (PY-IM) in	17
effect on apoptosis	157	ribozyme in	15
estrogen receptor binding studies of	154	role of antisense	14
estrogenic stimulation by	154	Cathepsin D inhibitors	27
inhibition of proliferation of human breast		characterization of	27
cancer MCF-7 cells by	153	preparation of	27
molecular modeling study of	147	with hydroxyethylamine isosteres	27
structure-activity relationships of	147	Cerium (III)/Neodymium(III) complexes	463
synthesis of	147	antioxidant activity of	467
Bioreductive drugs	315	as scavengers of X/XO-derived superoxide	
chemical entities developed as	315	radical	463
Bis-dihydropyridines	527	pharmacology of	466
structurally related to nifedipine	527	Chromene derivatives	363
vasodilator effects of	527	as azole antifungal target	363
Bis-dioxopiperazines	369	as lanosterol 14 α -demethylase inhibitor	363
anti-proliferative effects of	370	QSAR study on	363
Bisphosphonates	223	Compound prefiltering	102
caspase-3 activation assay of	224	Curcumin	169
cytotoxicity assay of	223	binds to CBP/p300 proteins	171
effect on proliferation of human ovarian cancer		to inhibit histone acetylation <i>in vivo</i>	170
cell lines	223	Cyclosporine-A	391
mechanism of	223	monitoring C ₀ (Trough)/C ₂ in	391
BPT	597	treatment of nephrotic syndrome	391
2-Bromoacridones	67	Cysteine derivatives	123
interact with P-glycoprotein by photolabeling	67	antiproliferative activity of	126
Caco-2 cell monolayer system	203	design/ligand docking of	123
Calcium channels	535	effect on melanoma cells	123
as therapeutic targets	536	solid phase synthesis of	126
auxiliary calcium channel subunits of	535	with antiproliferative activity	123
ω -conotoxin interaction with	538	Cystic fibrosis	499
design of small peptidic molecules targeting	541	adeno-associated virus vectors for	500
effect of morphine	537	adenovirus vector for	500
peptide inhibitors of	537	airway epithelium directed gene therapy for	499
small organic molecules targeting	539	gene delivery systems in	500
structure-activity relationship of ω -conotoxins		non-viral vectors for	501
AT	538	preclinical animal models of	502
Cancer	315	RNA virus vectors for	501
cytotoxin-releasing compounds in	320	DBPT	597
development of hypoxia selective cytotoxins		2'-Deoxyuridine	287
for	315	biological studies of	287
nitro compounds in	319	chemistry of	288
N-oxide derivatives in	315	<i>in vitro</i> anti-mycobacterial activities of	287
quinone derivatives in	319	synthesis of	287
Cannabinoid agonists	471	β -Diketonato complexes	227
A β [25-35]/(H ₂ O ₂)-induced apoptosis in		cellular DNA binding of	229
lymphocytes by	471	cellular sensitivity to	227
receptor-independent/P13K-dependent		MTT assay of	228
mechanisms of	471	of Chromium (III)	227

of Rhodium (III)	227	Histone hyperacetylation	127
of Ruthenium (III)	227	Homology modeling	191
Drug design	175	Hydroxamic acids	251
chimera method for	175	anti-inflammatory activity of	251
drug evolution concept in	175	as antioxidant	251
role of PABA chimera library	177	as novel lipoxygenase inhibitor	251
selection of scaffolds in	176	chemistry of	252
Duocarmycin C2	139	physicochemical studies of	254
biological evaluation of	139	synthetic methodology for	252
cytotoxicity studies of	144	Hypertensive renal diseases	15
(S)-(-)/R-(+)- <i>seco-iso</i> -cyclopropylfurano[e]		antisense treatments for	15
indoline-5,6,7-trimethoxyindole-2-carboxamide		ribozyme treatments for	17
(<i>iso</i> -CFI) analogs of	139	Insulin	299
synthesis of	139	to attenuates diabetes-related mitorchondrial	
Europium (III)	439	alterations	299
chemistry of	440	Interleukin-2	265
complexes with appended DNA intercalators		autocrine production of	265
in	439	Interleukin-10	611
cytotoxic/pro-apoptotic activities of	439	in rat hepatic stellate cells	611
in human malignant cell lines	439	on expression of FAS/FALL	611
pharmacology of	440	Inter-organelle cross-talk	1
Experimental acute pancreatitis	423	ASK/MAPK kinases-dependent	3
in rats	423	between cytosol/mitochondria	2
whole blood chemiluminescence assay to		between endoplasmic reticulum/mitochondria	5
study	424	between nucleus/mitochondria	4
Factor Xa	349	modulation of	1
containing 4-amidinobenzylamide as P1		mutual compartment influence of	1
residue	349	to control apoptosis	1
substrate analogue inhibitors of	349	Iron chelators	133
FAMS complex	191	antimalarial activity of	133
Fibrinogen receptor antagonists	295	design of	133
Flavone derivatives	401	synthesis of	133
molecular interactions with human cytochrome		JNK MAP kinase	216
P450 1A2	401	inhibitors of	216
Folic acid	407	JWH-015	471
as Fenton-modulator	407	A β [25-35]/(H ₂ O ₂)-induced apoptosis in	
physiological implication of	407	lymphocytes by	471
Galectin-3 glycomimetic inhibitors	481	receptor-independent/P13K-dependent	
based on 3D docked structures	481	mechanisms of	471
binding affinity prediction of	487	Leu-enkephalin analogues	203
hydrophobicity (lipophilicity) of	487	enzymatic stability of	203
QSAR model for	481	lipid/sugar modified	203
Gene therapy	499	role of caco-2 cell	203
barriers to lung gene transfer in	499	route of absorption of	203
Glycolipid-arsenicals (III)	79	Matrix metalloproteinase (MMP)-7	523
anti-proliferative effects of	79	to activates MMP-8	523
effect on MCF-7 human breast cancer cells	79	Matrix metalloproteinase inhibitors	243
Hemorrhagic shock	271	hydroxamic acid analogs as	243
activation of pulmonary NF- κ B	271	quantitative structure-activity relationship	
AP-1 activation induced by	271	studies on	243
<i>via</i> heme oxygenase-1 induction	271		

Micro RNA expression	555	N-type calcium channel blockers	535
in murine embryonic stem cells	555	for treatment of pain	535
radiation-induced response of	555	Organochlorines	607
Mitogen activated protein (MAP) kinases	213	high concentrations of	607
c-Jun <i>N</i> -terminal kinase (JNK) based	214	in anorexia-cachexia syndrome	607
extracellular signal-regulated kinase (ERK)		in patient with kidney cancer	607
based	213	Oxicams	447
inhibitors for	215	COX selectivity of	447
signaling modules of	213	interactions of	447
MMP-13	523	with membrane bilayers	447
MMPT	597	Oxidative stress	425
Molecular modeling studies	309	within pancreatic tissue	425
against SARS	309	p53	471
of peptide drug candidates	309	p300 Histone acetyltransferase	169
MST-16	369	curcumin as inhibitor of	169
against a murine tumor model	370	p38 MAP kinase	214,215
anticancer effects of	369	inhibitors of	215
antitumor activity on LAX-83	371	PABA chimera library	178
medicinal chemistry of	369	Partially modified retro-inverse (PMRI) peptides	395
Multidrug resistant (MDR) cancer cells	63	as scaffolds for generating new molecular	
correlation between anti-calmodulin activity/		topology	395
anti-MDR activity	63	novel family of	395
correlation between anti-calmodulin activity/		Peptide vaccines	629
inhibition of cellular growth	70	advantages of	629
effect of vinblastine	63	clinical trials of	632
sensitization of	63	design of	629
<i>Mycobacterium avium</i>	505	MHC polymorphism in	632
antifolate inhibitorsfor	505	problems with	630
N-[4-1H(2H)-benzotriazol-1(2)-l)phenyl]		PGDF mimetics	295
alkylcarboxamides	577	<i>P</i> -glycoprotein	565
anti-viral activity of	577	computation calculations of	566
chemistry of	577	physicochemical characteristics of	565
<i>in vitro</i> evaluation of	577	<i>P</i> -glycoprotein inhibitors	565
molecular modeling of	579	computation calculations of	566
synthesis of	577	of cage dimeric 1,4-dihydropyridine type	565
virology of	579	physicochemical characteristics of	565
N ⁴ -(2,5-dimethylphenyl/-2-fluoro-5-methyl phenyl)		Phenazine 5,10-dioxide derivatives	511
semicarbazones	617	as hypoxic selective cytotoxins	511
anticonvulsant activity of	617	biological activity of	513
chemistry of	617	chemistry of	511
pharmacological activity of	618	DNA binding assay of	513
quantum mechanical modeling studies of	621	mechanism of action of	513
synthesis of	617	structure-activity relationship studies of	511,514
N ⁴ -(2,5-disubstituted phenyl) semicarbazones	617	3-Phenoxymethyl quinoxalin-2-ones	113
chemistry of	617	activity of	113
pharmacological activity of	618	biological assays of	115
quantum mechanical modeling of	617,621	chemistry of	119
Nephrotic syndrome	391	synthesis of	113
NF-κB	471	Pigment epithelium-derived factor (PEDF)	265
Non-ATP binding domains	217	effect on angiotensin II-induced T cell	
MAP kinase inhibition of	217	proliferation	265
NQO1	276		
assay of	276		
expression of	278		

- effects on IL-2 mRNA levels 267
 effects on NADPH oxidase activity in
 MOLT-3 T cells 267
 effects on ROS generation in MOLT-3 T cells ... 267
p-Nitrobenzyl esters21
 hydrogenolysis of21
 Poly(ADP-ribose) polymerase-1 inhibitor 3-
 aminobenzamide47
 effect on apoptosis induction by platinum
 complexes47
 in cisplatin-resistant tumor cells47
 Probimane 369
 against a murine tumor model 370
 anticancer effects of 369
 antitumor activity on LAX-83 371
 medicinal chemistry of 369
 Progressive renal disease13
 development of gene therapies for13
 nucleic acid medicines in13
 pyrrole imidazole poly amides (PY-IM) in17
 role of antisense14
 Protease inhibitor 349
 anticoagulant activity of 357
 x-ray crystallography of 350
 Protein complex structures 191
 automated homology modeling system for 191

 QSAR 363
 Quinoxalines 113
 activity of 113
 biological assays of 115
 chemistry of 119
 synthesis of 113

 Radiation-induced alterations 557
 of miRNA expression in ES 557
 Resveratrol 275
 in human K562 cells 275
 induction of quinone reductase NQO1 by 275
 nuclear translocation of 275
 Retinoic acids 431
 mechanism of action of 431
 Retinoids 431
 based therapies 436
 development of 436
 in clinical investigations 432
 in clinical use 431
 mechanism of action of 431
 Ribozyme15
 principle of15

 SARS 309
 Septic shock 423
 whole blood chemiluminescence assay to study .. 424

 Sertraline385
 determination of dissociation constant of386
 determination of partition coefficient in
 cyclohexane/water system of386
 determination of partition coefficient in
 octanol/water system of386
 determination of thermodynamic solubility of386
 ionization of385
 lipophilicity of385
 physico-chemical profiling of385
 solubility of385
 Short synthetic peptides627
 as vaccines627
 Small molecule kallikrein inhibitors545
 binding kinetics studies of546
 discovery of highly potent type545
 molecular modeling of548
 plasma BK release studies of547
 Sorbitol dehydrogenase (SDH)239
 expression of240
 inhibitory assay for240
 purification of240

 4-(1,2,3,4-Tetrahydro-isoquinoline-7-yl) amino-4-
 oxo-butyric acid derivatives295
 Transcription factor Nrf2275

 Unliganded HIV-1 reverse transcriptase491
 molecular dynamics model of491

 Vaccines627
 peptides as628
 Virtual screening89,239
 as analyzed by target class89
 consensus scoring in107
 discovery of sorbitol dehydrogenase inhibitors
 from239
 flexible receptor binding in107
 of aspartyl proteases100
 of cysteine proteases96
 of G protein-coupled receptors91
 of inhibitors to targets ATP binding site93
 of kinases92
 of metalloproteases99
 of nuclear hormone receptors100
 of proteases96
 of serine proteases99
 programs/databases in90
 to target structure89

 Xanthone377
 cytoprotective effects of377
 from *Hypericum annulatum* in models of
 epirubicin-induced cytotoxicity377
 mechanistic investigations on377
 SAR-analysis of377
